Developing a Competitive Edge

Empowering individuals and businesses with resources to compete in today's marketplace.

If you can understand it, the mind can achieve it.

WorkforceSkills™ Training Centers (WSTC) and its 50+ years of experience in the business, education and technical fields, provides career training, education, support information and career exposure for the residents and businesses of Lake County. WSTC connects employees to employers, and employers with employees. We aim to cultivate a harvest of well trained citizens creating the potential for a thriving 21st century economy. While focusing on the solution instead of being lodged within the problem, WSTC has developed a multi-dimensional strategy which connects people, education, skills training, and intra business collaboration, thereby utilizing rational procedure to create a first class trained, regional workforce.

WSTC supports and advocates education, skills training, human development, social solidarity, partnership, networking and community collaboration. We endeavor to empower our community with the tools necessary to annihilate the stranglehold of poverty. We are committed to the empowerment and upward mobility of our community through education, skills training, and employment. We will supply and disseminate the resources necessary to compete, and succeed in today’s economic market.

"WSTC is a valuable employment education resource for employers and potential employees. It’s a great way to connect to the many self-enrichment resources that are available to individuals and businesses, including providing competitive technology and business related training. I like the fact that I am able to obtain and gather the employment research and training needed for my success in an unbalanced employment market."

Peter Johnson, Executive Director
Management Development Group, Inc.

Make the connections to Succeed
